Subject: draft desk statement

Mark and Mary – here is the desk statement the team has developed for your review

Today EPA received a letter from the Missouri Attorney General which included reports produced by several experts regarding the underground smoldering event in the Bridgeton Landfill, as well as groundwater and vegetative growth conditions around the landfill. EPA is currently reviewing these reports.

All valid scientific data related to the West Lake Landfill Superfund Site is of interest to the Agency and we will consider all such relevant data in our decision making at the site.

Thank you,

Lynn M. Juett
